Contents of Volume 84 1999/2000

Belgacem FB: The Mortar finite element method with Lagrange multipliers 173
Bellen A, Maset S: Numerical solution of constant coefficient linear delay differential equations as abstract Cauchy problems 351
Benamou J-D, Brenier Y: A computational fluid mechanics solution to the Monge-Kantorovich mass transfer problem 375
Brenier Y → Benamou J-D

Carstensen C, Roubíček T: Numerical approximation of young measures in non-convex variational problems 395
Chen Z, Nochetto RH: Residual type a posteriori error estimates for elliptic obstacle problems 527
Costabel M, Saranen J: Spline collocation for convolutional parabolic boundary integral equations 417

Gao W → Xue J
Goodman TNT, Lee SL: Convergence of nonstationary cascade algorithms 1

Hairer E: Backward error analysis for multistep methods 199

Johnson MJ: An improved order of approximation for thin-plate spline interpolation in the unit disc 451

Korotov S, Křížek M: Finite element analysis of varitional crimes for a quasilinear elliptic problem in 3D 549
Koto T: Stability of Runge-Kutta methods for the generalized pantograph equation 233
Křížek M → Korotov S

Lacoste P: Solution of Maxwell equation in axisymmetric geometry by Fourier series decompostion and by use of H (rot) conforming finite element 577
Lai M-J, Wenston P: On Schwarz's domain decomposition methods for elliptic boundary value problems 475
Larson MG, Niklasson AJ: Adaptive multi-level finite element approximations of semilinear elliptic boundary value problems 249
Lee SL → Goodman TNT

Maitre E, Witomski P: Transport equation with boundary conditions for free surface localization 275
Maset S → Bellen A
Melenk JM: Operator adapted spectral element methods I: harmonic and generalized harmonic polynomials 35
Mortreux P, Prévost M: On totally monotonic families of sequences 71

Niklasson AJ → Larson MG
Nochetto RH → Chen Z

Perugia I: A mixed formulation for 3D magnetostatic problems: theoretical analysis and face-edge finite element approximation 305
Pflaum C, Zhou A: Error analysis of the combination technique 327
Pitkäranta J, Suri M: Upper and lower error bounds for plate-bending finite elements 611
Prévost M → Mortreux P
Prohl A: A first order projection-based time-splitting scheme for computing chemically reacting flows 649

Roubíček T → Carstensen C

Saranen J → Costabel M
Scherer R, Schira T: Estimating quadrature errors for analytic functions using kernel representations and biorthogonal systems 497

Schira T → Scherer R
Schöberl J: Multigrid methods for a parameter dependent problem in primal variables 97
Steinbach O: On a hybrid boundary element method 679
Suri M → Pitkäranta J

Tsuchiya T: An application of the Kantorovich theorem to nonlinear finite element analysis 121

Wenston P → Lai M-J
Witomski P → Maitre E
Wohlmuth BI: A residual based error estimator for mortar finite element discretizations 143

Xue J, Gao W: Blockwise perturbation theory for block p-cyclic stochastic matrices 519

Zhou A → Pflaum C

Online edition in LINK-*Mathematics Online Library* http://link.springer.de

Comprehensively covered by *Zentralblatt MATH, Mathematical Reviews*, and *Current Contents*
